#### ***Allowable Subject Matter***

3. Claims 1-4, 6-21 & 23-29 are allowed.
4. Claims 1-4, 6-21 & 23-29 and renumbered as claims 1-27 respectively are allowable over the prior art of record because the cited references do not contain the specified limitation of a method of channel equalisation comprising: receiving a data stream generated from a plurality of space time coded (STC) data streams received from a plurality of transmit antenna elements; generating via a fast transform a packet spectrum of at least a portion of the data stream, the packet spectrum being a transform domain representation; receiving a training sequence for a channel through which the data stream has been sent and assessing a channel impulse response for the channel based on the training sequence; generating via a fast transform a channel impulse response spectrum in the transform domain for the channel impulse response; equalising the packet spectrum with the channel impulse response spectrum to produce an equalised packet spectrum in the transform domain; and converting the equalised packet spectrum into time domain equalised data for recovery of information.
5. The examiner further notes the reason for allowance as disclosed in the BPAI decision dated Dec. 20<sup>th</sup>, 2006.
